EDUCATION

- B.E. Computer Science and Engineering (AIML),
  Sri Sairam Engineering College, Anna University,
  CGPA: 8.57/10, 2024-2028
- Higher Secondary (12th) — St. Joseph's Mat Hr Sec School
  Board: State Board | Percentage: 91.33% | 2024

SKILLS

- Programming: Python , C , Java
- Vibe Coding: (JavaScript , HTML, CSS, React, Node.js) , UI/UX Design Focus ,Fronted
- Core Concepts: Machine Learning, Data Structures, OOP, DBMS (basic)
- Tools & Technologies: Git, VS Code, Docker, LiveKit , LLM Tools (ChatGPT, Gemini, Claude) , API Integration, FastAPI , Uvicorn, Vite

PROJECTS

Synara – Real-Time AI Assistant:

- Built an interactive AI assistant with real-time audio communication using LiveKit
- Implemented low-latency streaming to enable natural, conversational user interactions
- Integrated speech + AI processing to handle user input and deliver dynamic responses
- Designed a scalable architecture to support continuous, real-time communication.

Fraud Detection in UPI Transaction:

- Developed a real-time AI-based fraud detection system to identify and prevent fraudulent UPI transactions with minimal latency
- Implemented behavioral anomaly detection using machine learning models (Isolation Forest /Random Forest/ XGBoost/ Autoencoders) for dynamic risk scoring

- Built scalable backend APIs using Python and FastAPI to process live transaction streams
- Designed efficient data handling with PostgreSQL and Redis for real-time analysis and caching
- Integrated instant fraud alerts using Firebase Cloud Messaging and tested transactions

PANDIYIN – Nature In Pack (Full-Stack E-Commerce Platform)

- Built a responsive e-commerce platform using React, Supabase, and Vercel for traditional food product sales.
- Implemented secure authentication with Google OAuth and Supabase Auth with protected API handling.
- Developed cart, checkout, and order workflow with dynamic delivery charge calculation based on location and product weight.
- Integrated Razorpay payment gateway supporting UPI, cards, and net banking with optimized transaction flow.
- Enhanced UX with GPS-based address autofill, mobile-optimized UI, sticky purchase bar, and performance optimizations.

Work Experience:

- **Euclid Technologies**

➢ Worked as an Machine Learning intern in Euclid Technologies Bangalore

  - **Internship Start Date: 15/06/2025**
  - **Internship End Date: 15/08/2025**
  - **Projects Undertaken:** CardioVascular Disease prediction using ML, RealTime License Plate recognition using ML

- **Edunet Foundation – Skills Build (IBM)**

➢ Working as an Artificial Intellilgence and Machine Learning Intern

  - **Internship Start Date: 15th January 2026**
  - **Internship End Date: 26th February 2026**
